

**Job Title: Senior DevOps & Cloud Infrastructure Engineer**

**Company: CloudScale Networks**

Experience: 4-7 Years

Location: Hybrid / Remote

Overview:

We are looking for a Senior DevOps Engineer to lead our cloud infrastructure automation, CI/CD modernization, and Kubernetes platform management.

Responsibilities:

- Build and maintain resilient Infrastructure as Code (IaC) using Terraform and Ansible.
- Manage multi-cluster Kubernetes environments on AWS (EKS) and Google Cloud (GKE).
- Design automated CI/CD pipelines with GitHub Actions, GitLab CI, and ArgoCD.
- Monitor system reliability, uptime, and performance using Prometheus, Grafana, and Datadog.
- Implement security best practices, secrets management (HashiCorp Vault), and IAM policies.

Requirements:

- Cloud Providers: AWS (EC2, EKS, RDS, S3) or GCP
- Container & Orchestration: Docker, Kubernetes, Helm, ArgoCD
- Infrastructure as Code: Terraform, Ansible
- CI/CD: GitHub Actions, Jenkins, or GitLab CI
- Scripting & Automation: Bash, Python, Linux system administration
- Observability: Prometheus, Grafana, ELK Stack
