Location: San Francisco, CA

SUMMARY

Senior Software Engineer with 4.5 years of experience building scalable web architectures, microservices, and AI-powered integrations. Proven expertise in Python, FastAPI, React, and Google Gemini LLM orchestration.

TECHNICAL SKILLS

- Programming: Python, TypeScript, JavaScript, SQL
- Frameworks: FastAPI, Flask, React.js, Next.js, Node.js
- AI & LLM: Google Gemini API, OpenAI API, LangChain, RAG architectures, Prompt Engineering
- Databases: PostgreSQL, Redis, Pinecone Vector Database
- Cloud & DevOps: Docker, AWS (S3, ECS, Lambda), GitHub Actions CI/CD, Git

EXPERIENCE

Lead Software Engineer | Apex AI Labs (2022 - Present)

- Developed and deployed multi-tenant conversational AI assistants utilizing Google Gemini and FastAPI.
- Implemented RAG pipeline with Pinecone and PostgreSQL pgvector, cutting query response times by 35%.
- Containerized microservices using Docker and orchestrated deployment via AWS ECS with automated CI/CD.

Full Stack Developer | CloudScale Solutions (2020 - 2022)

- Built interactive customer dashboards in React and Next.js, serving 50k+ daily active users.
- Designed RESTful APIs in Python and integrated third-party webhooks (Telegram, Slack).
- Collaborated in an agile scrum team to write unit and integration tests.

EDUCATION

B.S. in Computer Science | University of California, Berkeley (2016 - 2020)
